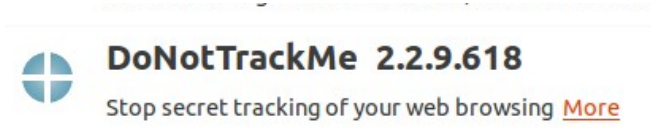
Already used this one

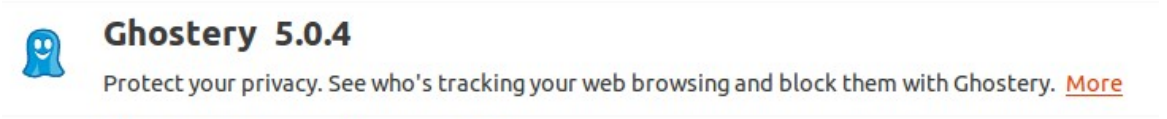
Blocks advertisement

+ Nice clean pages \o/

- Removes a so-called super-cookie from your system
  - Can contain more data than normal cookies
  - Is something most people are unaware of
  - Allow for cross-browser tracking

- They are removed automagically on browser start/exit with this plugin





- Block websites that track you
  - Advertisement
  - Analytics
  - Big internet companies
- Ghostery seems to recognize more than DoNotTrackMe. Interface is also nicer

Collaboration between EFF and Tor

Rewrites http requests to https

Based on a white-list

Blocks all JavaScript and Java stuff

Unless you unblock it (temporarily)

Many websites won't work
