Upcoming Event: Internet History of Ex-Yugoslavia

The RIPE NCC is proud to bring a very special panel session on the history of Internet development in the region. The session celebrates the work of Internet pioneers in ex-Yugoslavia and is the first gathering of its kind at the RIPE NCC's Regional South East Europe Meeting (SEE 10) taking place on Monday, 11 April 2022.

Today, it is clear the Internet is of great importance to people's lives, businesses and to society. The history of how the Internet came to be and the infrastructure behind it is both fascinating and inspirational.

RIPE NCC Community Builder Vesna Manojlovic said: "As an active participant in the early days of the Internet in the region, I am excited to hear the stories from panel members. This is hopefully just the first of a series of historical overviews of Internet developments in the region. Although these histories seem ancient in Internet years, they are incredibly relevant today since we are again struggling with keeping communications flowing and keeping the Internet open in Europe."

Join the panel discussion, online or in person

Panel date: Monday, 11 April 2022
Time: 17:00 (UTC+2)
Venue: Grand Hotel Union, Ljubljana
Attendance is free
For more details and to register for the event, visit:

-Darko Bulat, First Croat Internaut
-Željko Drašković, MIXP, ME
-Wam Kat, ZaMir
-Daniel Karrenberg, RIPE NCC
-Chaired by: Slobodan Markovic, UNDP

RIPE NCC

The RIPE NCC is the Regional Internet Registry for Europe, the Middle East and parts of Central Asia. As such, we allocate and register blocks of Internet number resources to Internet service providers (ISPs) and other organisations.

We're a not-for-profit organisation that works to support the RIPE (Réseaux IP Européens) community and the wider Internet community. The RIPE NCC membership consists mainly of Internet service providers, telecommunications organisations and other companies that manage their own network infrastructure.

SEE Meetings

Since 2011, the RIPE NCC has organised regional meetings throughout South East Europe. These events gather network engineers, regulators, academics and other technical staff to share knowledge and experiences and to identify areas for regional cooperation.
