Aligning Computing Research and Sust Practices - ICT4S 2024 Workshop Signu

You responded to this form on 4/10/2024, 4:33:48 PM

How can the multiple branches of computing research align with socially, economically, and ec practices? In this co-design workshop, we look for a group of at least 10 colleagues with whom answer to this question through the process of writing a book in the form of an edited collectic

Therefore, in this form, we will ask you some information that can help us set up a great group will review applications as they come, so you could hear from us earlier than the foreseen dea

1. In which area of computing research do you position yourself?

Network Operations, Internet Governance, Technical Standards & Sustainability

2. Which is the topic you would like to focus on while contributing to the proposed book?

sustainability, e-impact, degrowth, feminist internet, diversity, Climate Justice, Climate Action

3. Please, share with us the reference to one of your publications that you want us to look at.

https://labs.ripe.net/author/becha/environmental-impact-of-internet-urgency-de-growth-reb

4. Please list your name, affiliation, and email address.

Vesna Manojlovic, RIPE NCC / UnCiv.nl / becha@xs4all.nl
