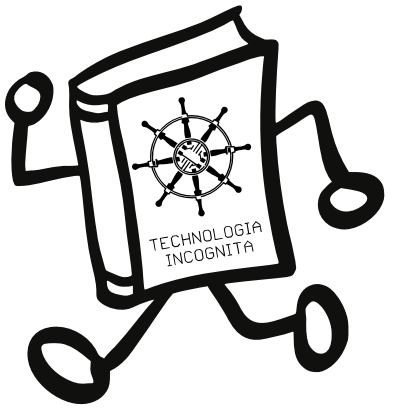
Bookcrossing

The idea



Travelling books!

Follow your books while they travel

… and

Take books home,

read them,

and release them when you're done

Book Crossing

Book Crossing is for the exchange of books, for free, and for tracking the books as they travel the world around.

http://www.bookcrossing.com/

The plan is to create a bookshelf in the Hackerspace, where people can bring their books & have them marked; or pick up the book from the bookshelf.

There are ways to make this easier or harder. One of the ways involves child labor ;-)

- TechInc bookshelf
- TechInc book release location

Contents

1 Print labels

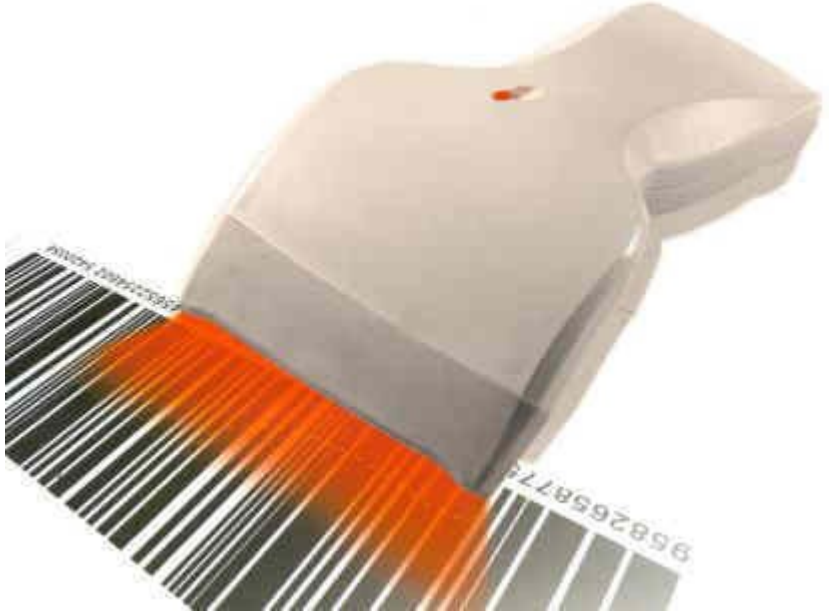
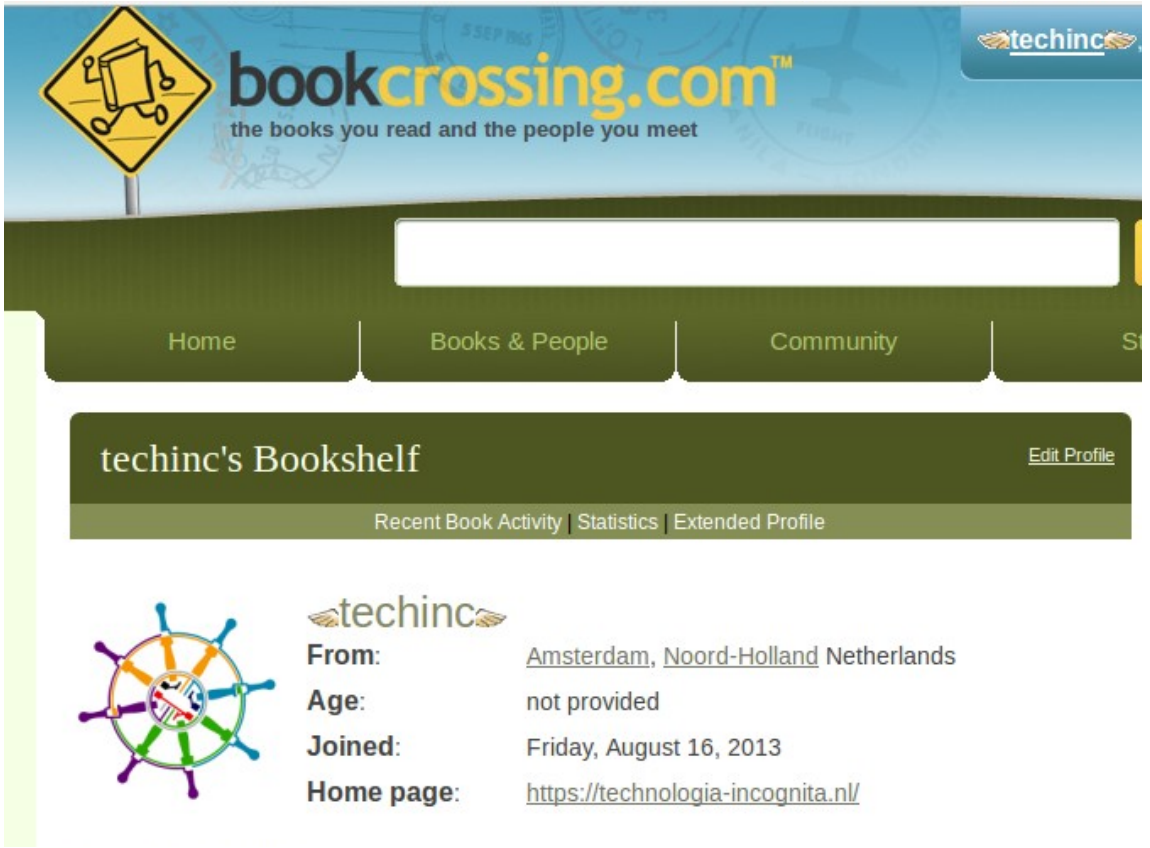
FREE
BOOKS

How: register books

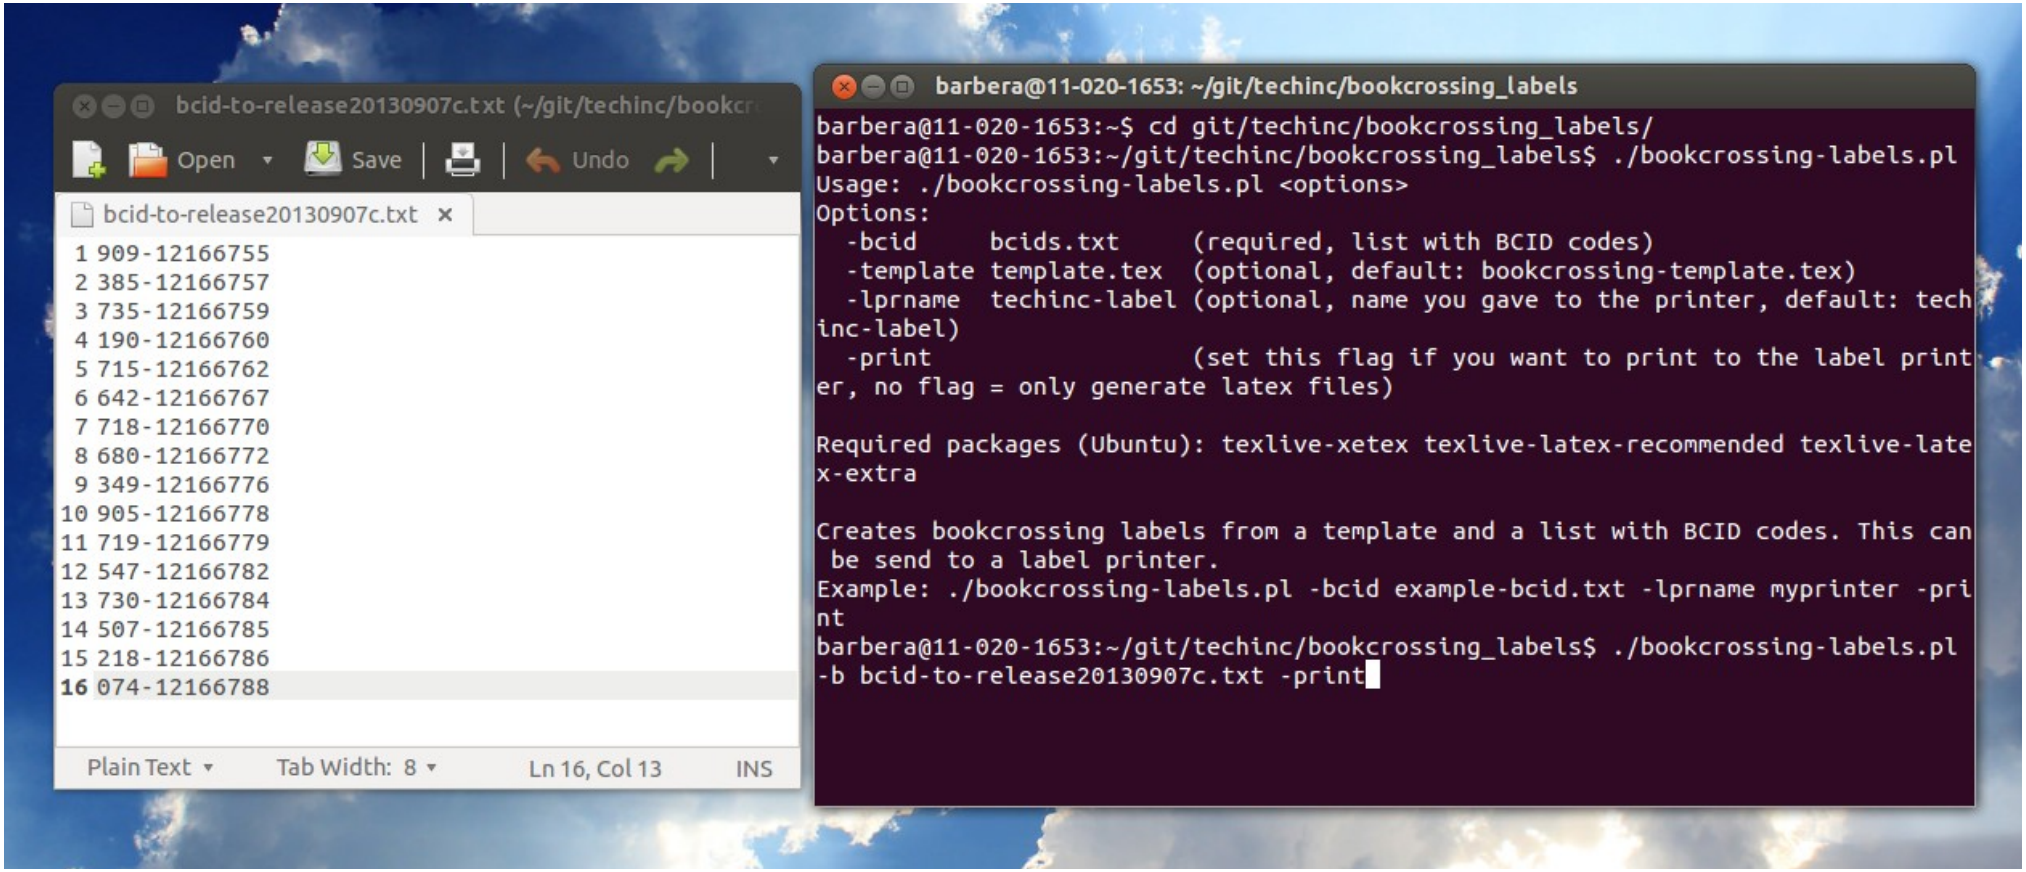
- Scan book, or type ISBN, or title



Then: click a few (too many) times
… and you get back a **BCID**



Label all the books



https://github.com/techinc/bookcrossing_labels
