Imagine a Feminist Internet

1. A feminist internet starts with and works towards empowering more women and queer persons – in all our diversities – to dismantle patriarchy. This includes universal, affordable, unfettered, unconditional, and equal **access** to the Internet.

2. A feminist internet is an extension, reflection, and continuum of our movements and **resistance** in other spaces, public and private. Our agency lies in us deciding as individuals and collectives what aspects of our lives to politicize and/or publicize on the internet.

3. The internet is a **transformative** public and political space. It facilitates new forms of citizenship that enable individuals to claim, construct, and express our selves, genders, sexualities. This includes connections across territories, demands for accountability and transparency, and significant opportunities for feminist movement-building.

4. **Violence** online and tech-related violence are part of the continuum of gender-based violence. The misogynistic attacks, threats, intimidation, and policing experienced by women and LGBTQI people are real, harmful, and alarming. It is our collective responsibility as various internet stakeholders to prevent, respond to, and resist this violence.

9. The internet's role in enabling access to critical **information** - including conversations on health, pleasure, and risks - is essential, and must be supported and protected.

10. Surveillance by default is the tool of patriarchy to control and restrict rights both online and offline. The right to **privacy** is a critical principle for a safer, open internet for all. Equal attention needs to be paid to surveillance practices by individuals against each other, as well as the private sector and non-state actors, in addition to the state.

11. We have the right to access all our personal **data** online and to be able to exercise control, which includes knowing who has access to the data and under what conditions and being able to delete it forever. However, this right needs to be balanced against the right to access public information, transparency, and accountability.

12. We strongly object to the efforts of state and non-state actors to control, **regulate** and restrict the sexual lives of consenting people and how this is expressed and practiced on the internet. We recognize this as part of the larger political project of moral policing, censorship and hierarchization of citizenship and rights.

The End of the Internet Dream

In 20 years, the Web might complete its shift from liberator to oppressor. It's up to us to prevent that.

NATURE

Important things you need to know - Earth user guide

1. This is where you live
2. You and the other 15 million plants and animals are Earth's family
3. 50,000 of these plants and animals become extinct each year
4. We are consuming all other species and causing Earth's 6th mass extinction
5. This is comparible to a large asteroid strike
6. Lifestyle changes can stop this happening

a) Population collapse following an apparent equilibrium due to a small initial Elite population when $\kappa = 100$. This scenario also shows a different route to a collapse, in which, although Nature eventually recovers, population does not.

RHWYDWAITH ★ GWEITHREDU ★ ANARCHAIDD

My part of the story

- Death is part of Life
- All we can do is to love
- This, too, shall pass
- Only love remains
- I am enough
- Love is all we have left

I DON'T SHARE MY THOUGHTS BECAUSE I THINK IT WILL CHANGE THE MINDS OF PEOPLE WHO THINK DIFFERENTLY.

I SHARE MY THOUGHTS TO SHOW THE PEOPLE WHO ALREADY THINK LIKE ME THAT THEY'RE NOT ALONE.
